Thanks to fast fashion, people now can buy new clothes with nice designs at a low price. However, the truth behind those beautiful clothes can be really ugly.

To keep the prices low but still make money, fast fashion companies move the factories to countries where a worker makes only about NT\$2.5 dollars for an hour's work and use polyester to make clothes because it is cheap. Those workers work long hours for very low pay and the polyester ultimately goes into the sea and hurts the environment after we wash these clothes made of it.

Therefore, for those poor workers and our environment, the cost is high. Next time, when you want to buy clothes from fast fashion companies, stop for a second and think—do I really need them?

Camping is a very popular activity these days, and it is important to know how to set up a tent in the right way. Here is a step-by-step guide.

Step 1: Choose the best place for your campsite. It should be on higher ground and away from any dangerous animals.

Step 2: Once the tent is on the tarp, connect and put it in the tent poles. These poles should go in each corner of the tent and allow your tent to be raised.

Step 3: First, lay the tarp on the ground. This is a sheet that should protect your tent from getting wet if the grass is wet.

Step 4: Place the tent on the tarp. The door of the tent should be facing away from the wind.

Step 5: Put the large nails into the ground. Use a hammer to do this, and then attach your tent to the nails.

Step 6: Place the rainfly over the tent. This cover will provide protection for your tent.

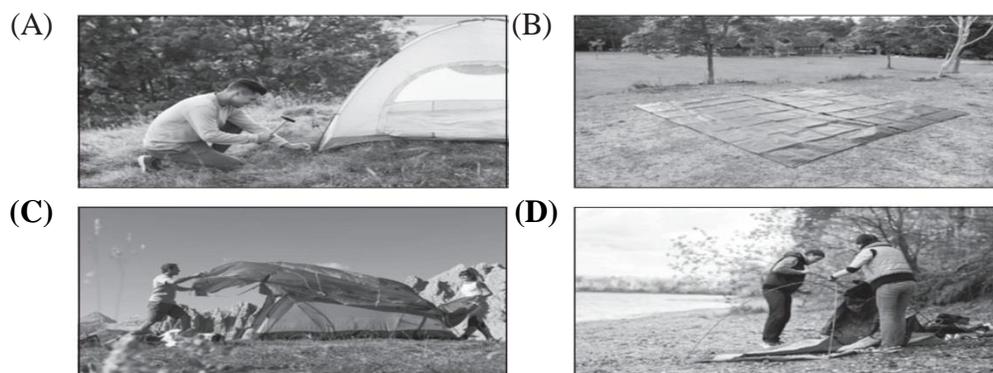

Step 7: Attach the guy ropes. These are ropes that are used to keep the rainfly safely connected to the ground and stop it from blowing away in strong winds.
